

# MarS: A Financial Market Simulation Engine Powered by Generative Foundation Model

Junjie Li\*, Yang Liu\*, Weiqing Liu†, Shikai Fang, Lewen Wang, Chang Xu, Jiang Bian

## **Industry Engagement and Main Job**

- 8 years of deep collaboration with financial industry partners.
- Research topics from real tasks
- Building ML models on market indicators, but rarely go inside.

## The Challenge & Opportunity of Going Inside

- Overwhelming and complex data inside
  - Challenge for traditional methods

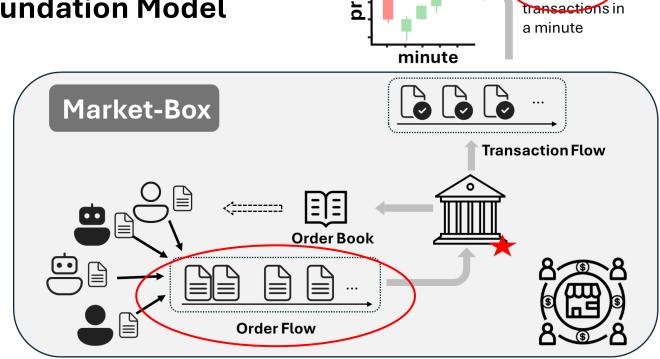

**Instrument: MSFT** 

Order ID: 000001 Time: 09:30:00.050

Type: Buy

**Price**: 420.01 **Volume**: 100

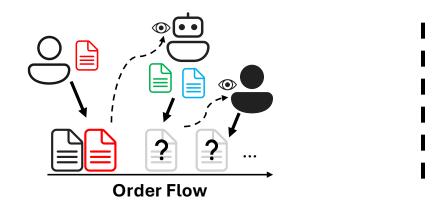

Opportunity for Large Foundation Model

## Key Info in Order Flow and Its Tokenization

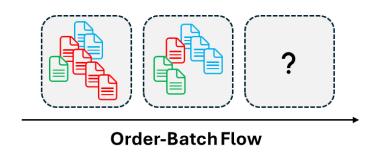

Individual Perspective in Microscopic

Tokenization of a **Single Order** 

Market Perspective in Macroscopic

Tokenization of an Order-Batch

# Large Market Model (LMM) and the Scaling Law

Transformer-based Auto-regressive Training on Two-Kinds of Token Series

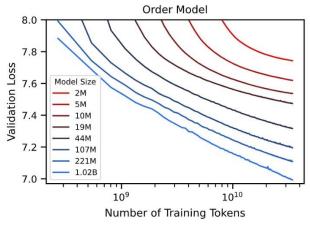

#### **Order Model**

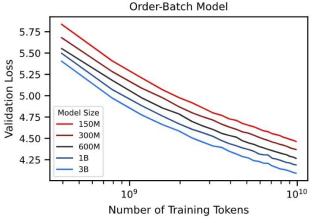

Individual Perspective in Microscopic

#### **Order-batch Model**

Market Perspective in Macroscopic

## **New Paradigm with LMM**

# **Tradition New Paradigm**

## **New Paradigm for Financial Market Predictions**

### Estimate future market indicators

#### **Traditional Methods**

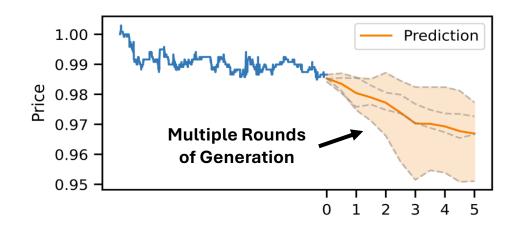

Need redesign for new targets.

#### New Approach

- Uses recent real data as input in LMM.
- Generates future order flows and corresponding market trajectories.
- Derives any indicator's point / distributional forecasting across diverse horizons from multiple future market trajectories.

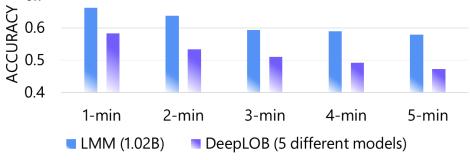

#### **Enhanced Performance**

- Outperforms traditional algorithms in predictions.
- Evidence of LMM's powerful modelling capabilities.

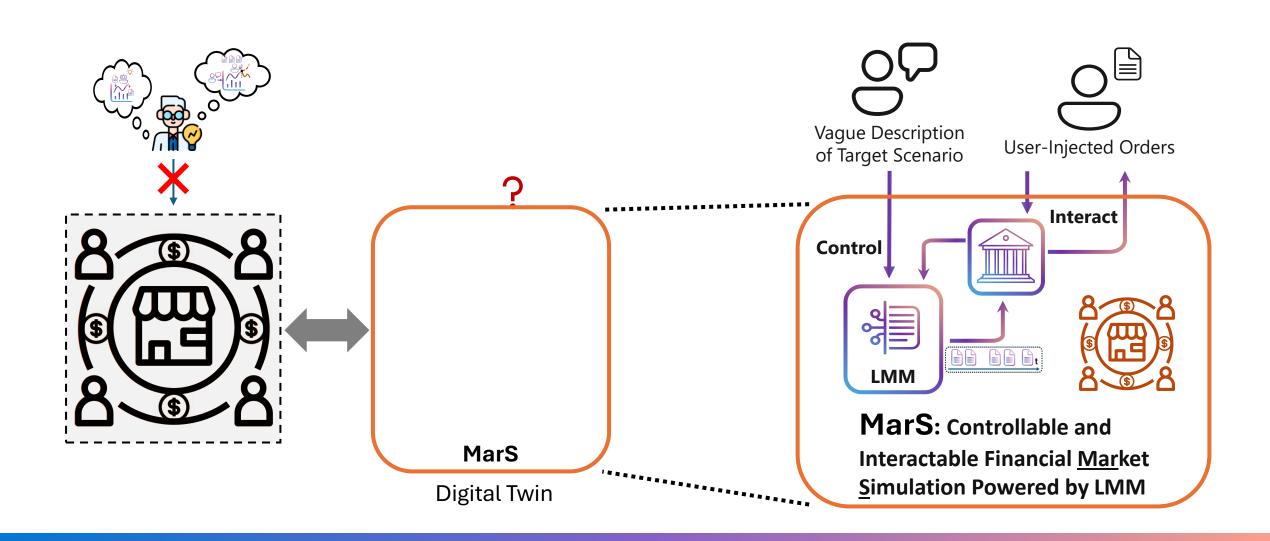

3-CLASS CLASSIFICATION OF PRICE PREDICTION

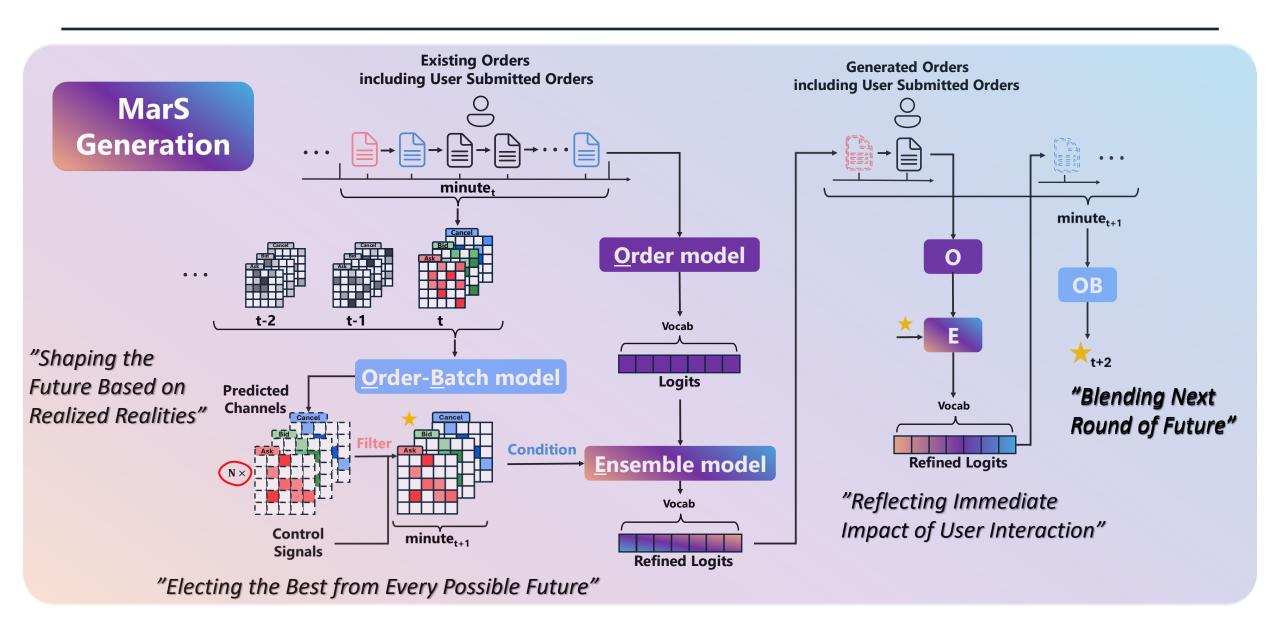

## **New Ways with MarS**

## The Process of Order Flow Generation

## New Way for Market Impact Analysis

Microsoft

- Impact of trading order on markets with different conditions

#### Traditional Methods

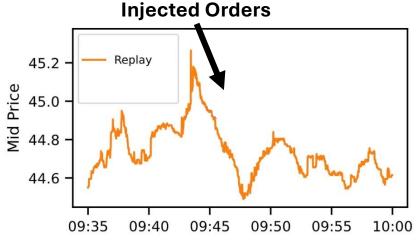

Use real transactions for feedback; costly & risky.

#### MarS Benefits

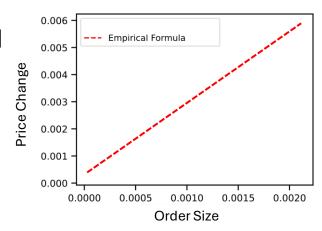

- Simulates accurate market impact curves.
- Cost-effective alternative to data collection.
- Enables data-driven research on collected data.

#### Overall Advantage

- Evidence that MarS effectively represents a digital twin of the real market.
- Define a new way for financial experts to understand their area.

**Simulation with Market Impact of Inject Orders** 

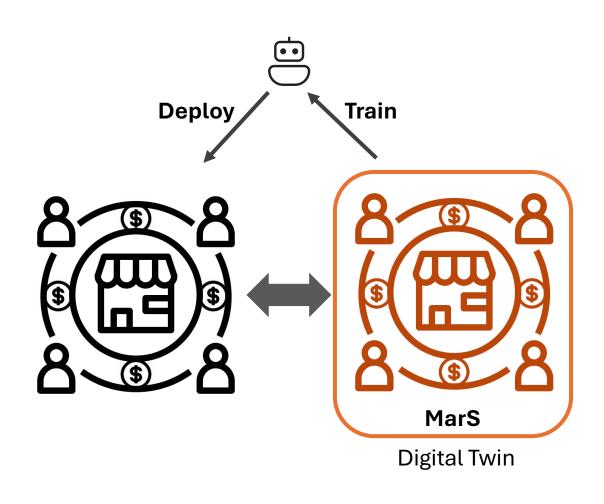

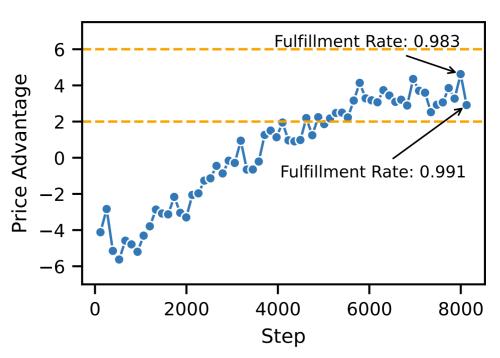

Simulation Results Align Well with Empirical Formula from Real Trans.

≈ Observed 
$$g = 9.8 \, m/s^2$$
 in Sora

## New Horizon for Intelligent Agents

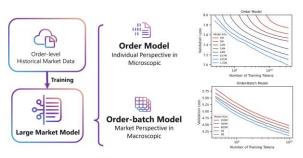

A RL Agent for Order Execution on MarS can reach promising results.

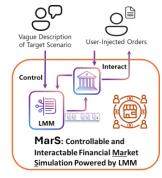

## **Summery: A Promising Beachhead!**

• LMM: Order Generation as Large Foundation Model of Financial Market

• MarS: Digital Twin and New Paradigms, New Ways & New Horizons

New Paradigm for Mainstream Tasks in Finance Industry

New Way for Financial Experts to Understand Their Area

New Horizon for Applying Intelligent Agent in Finance Industry
